Important Notice NEW Electrical Safety Program

With support from the Operations Safety Advisory Committee, RMS has developed a new Electrical Safety Program ([link](#)). This program provides guidelines to personnel working on or near electrical systems and standardizes training, operations, and work practices to assure the safety of all personnel conducting these activities.

The [Electrical Safety](#) page on the RMS website contains numerous resources including the [Electrical Safety Procedure](#), Training Requirements, excerpts from NFPA tables, and links to forms needed to safely conduct electrical work on campus.

If you have any questions please contact RMS.

All safety communications can be found at <https://riskmanagement.nd.edu/communication/>.
