

## **Record of Controlled Substances Administered or Dispensed**

One log sheet must be completed for each container of Controlled Substance. If the material is converted or diluted, start a new log form to track that usage; reference the original container's lot or serial number and original container number assigned by lab.

**DEA Number** 

Controlled Substance usage must be tracked on a per dose (use) basis and only by an Authorized Individual. Record total quantity of the substance to the nearest metric unit weight/volume or the total number of units in finished form.
