

# Fall Protection Competent Person Training

RISK MANAGEMENT & SAFETY

**What:** Fall Protection Competent Person Training

**When:** September 18-19, 2017, 8-5 each day

**Where:** Location TBD

**Cost:** ~\$275/person (includes lunch each day)

**Class Size:** Limited to 25 attendees

RMS, in conjunction with the Operations Safety Committee, is updating the University's existing fall protection procedure. Included in this revision, the document charges departments with identifying competent persons in their organization to serve as subject-matter experts.

**FALL  
PROTECTION  
COMPETENT  
PERSON**

A competent person is an individual capable of identifying existing and predictable hazards in the surroundings or working conditions associated with the work at height and who has authorization to take prompt corrective measures to solve work at height problems.

To prepare these individuals, RMS is hosting a fall protection competent person training course on **September 18-19, 2017**. Topics addressed in this two-day course include:

- OSHA regulations,
- Hazard analysis,
- Principles of fall protection,
- Personal Fall Arrest Systems (inspection and donning procedures, fit test),
- Fall protection on aerial lifts and ladders, and
- Rescue.

Attendees will be provided workbooks, handouts, and example problems. Practical exercises will reinforce concepts and equip participants with the knowledge and skills needed to be a competent person.

Please provide names of those you'd like to attend to Randy Crist at 1-6025 or [jcrist1@nd.edu](mailto:jcrist1@nd.edu) **NLT August 4, 2017**. Class size is limited to 25. If interest exceeds this capacity, RMS may limit the number of people a department sends to accommodate the greatest number of organizations and will look to schedule an additional session.
