NEW ONLINE HEPATITIS B DECLINATION FORM

Hepatitis B Declination forms can now be completed online. RMS collaborated with the Office of Information Technology to create this online form for employees on campus who have been offered, but are declining the Hepatitis B vaccination.

The Hepatitis B Virus (HBV) vaccination is offered to employees identified in the exposure determination section of the [Bloodborne Pathogens Control Plan](#).

Employees may choose to complete the [Hepatitis B Declination](#) if they have previously received the complete HBV vaccination series, antibody testing has revealed that they are immune, or the vaccine is contraindicated for medical reasons.

Please direct any questions to Erin Hafner ehafner@nd.edu 574-631-7889.

Please feel free to distribute this notice as appropriate.
